

CLAIMS

What is claimed is:

- 1 1. In a unitary business machine with a top, bottom, front, back and two
2 sides, a customized form output apparatus, the apparatus comprising:
 - 3 a) electronic data storage for storing preselected customized forms;
 - 4 b) a display connected to the data storage for displaying stored forms;
 - 5 c) a selector connected to the data storage for selecting forms from
6 the display; and
 - 7 d) an integral hard copy printer connected to the data storage for
8 printing a hard copy of said forms as selected.
- 1 2. The apparatus of claim 1 further comprising a wall mount connected to the
2 back for mounting the apparatus on a wall.
- 1 3. The apparatus of claim 1 wherein said data storage is a hard drive
2 conformed to receive electronic input for new customized forms and to
3 store input forms.
- 1 4. The apparatus of claim 1 wherein said display is a flat panel display.
- 1 5. The apparatus of claim 1 wherein said selector is a touch screen
2 overlaying said display.
- 1 6. The apparatus of claim 1 further comprising a battery for providing power
2 for operation.
- 1 7. The apparatus of claim 1 wherein said selector further comprises user
2 selections from a group including select, print, and cancel.

- 1 8. The apparatus of claim 1 further comprising a paper holder connected to
2 said integral printer and to the back of the apparatus.
- 1 9. The apparatus of claim 1 wherein said hard copy of a selected form is
2 dispensed from the bottom of the apparatus and paper for printing is input
3 at the top of the apparatus.
- 1 10. A wall mounted print on demand form kiosk comprising:
2 a) a unitary box with a top, bottom, front, back, and two sides;
3 b) an electronic data storage means for storing customized forms in
4 electronic form connected to said box;
5 c) a flat panel display means connected to said data storage means for
6 displaying stored forms;
7 d) a touch screen selection means connected to said data storage
8 means overlaying said flat panel display means for selecting forms
9 from the display means;
10 e) an integral hard copy printer means connected to the data storage
11 means for printing a hard copy of a form as selected by a user; and
12 f) a power source connected to the box.
- 1 11. The kiosk of claim 10 wherein the box is conformed in size to
2 approximately match the length and width of a sheet of letter sized or legal
3 sized paper.
- 1 12. The kiosk of claim 10 further comprising a paper holder connected to the
2 printer means at the back of the box.
- 1 13. The kiosk of claim 10 wherein hard copies of selected forms are dispensed
2 from the bottom of the box and paper for printing is input at the top of the
3 box.

1 14. The kiosk of claim 10 wherein said box is conformed to hold fifty to one
2 hundred sheets of paper for printing.

1 15. The kiosk of claim 10 wherein said power source is a battery.

1 16. The kiosk of claim 10 wherein said data storage means is a hard drive
2 conformed to receive electronic input for new customized forms and to
3 store input forms.

1 17. A method of providing customized printed forms from a wall mounted print
2 on demand form kiosk comprising the steps of:

- 3 a) constructing a unitary box with a top, bottom, front, back and two
4 sides;
- 5 b) connecting a hard drive to said box for storing electronic copies of
6 customized forms;
- 7 c) connecting a flat panel display to said hard drive for displaying
8 stored forms;
- 9 d) connecting a touch screen selector to said hard drive and overlaying
10 said flat panel display for selecting forms from the display;
- 11 e) connecting a hard copy printer to said hard drive for printing a hard
12 copy of a form as selected by a user;
- 13 f) connecting a power source to said box;
- 14 g) loading customized forms on said hard drive;
- 15 h) selecting a form to be printed; and
- 16 i) printing said form.

1 18. The method of claim 17 further comprising the step of conforming the box
2 to the approximate size of the length and width of a sheet of letter sized or
3 legal sized paper.

1 19. The method of claim 17 further comprising attaching a paper holder to the
2 back of the box.

- 1 20. The method of claim 17 further comprising the step of constructing the
- 2 box so that hard copies of selected forms are dispensed from the bottom
- 3 of the box and paper for printing is input at the top of the box.
